- Proficient in Bootstrap, Materialize.
- Proficient in Vue, and React, Git, Typescript
- Familiar with Wordpress, MySQL, and PHP
- Familiar with Mocha, amCharts, and D3
- Familiar with AJAX, Docker
- Self-driven professional development

WORK HISTORY

Front-End Web Developer, 10/2020 to current

RateGenius – Remote

- Technologies used HTML, CSS, jQuery, Vue, JavaScript, PHP, Git, Bootstrap, Materialize, MySQL, Docker, Sass
- Updated multiples parts of our website from using Materialize to using Bootstrap
- Implemented changes and updated multiple part of our website, from prequalification pages, offer pages, and home page.
- Added more functionality to our application page, by adding form capability to autofill through query parameters as well as including new workflow, and services for new partners.
- Helped integrate and assimilate new services into our programs and assisted with bug fixes.
- Created and added multiple new custom fields for our Wordpress site, as well as fix pages bugs by directly implementing our own PHP files.

Front-End Web Developer, 02/2018 to 06/2020

Holistic Billing Services – Altamonte Springs & Remote

- Technologies used HTML, CSS, jQuery, React, JavaScript, PHP, Filezilla, Bootstrap, Materialize, MySQL
- Designed and implemented electronic SOAP Note (EMR) for clients, with heavy focus on the UI experience for them, making the form easy to follow, as well as ensuring a good usage and viewable experience making it completely mobile friendly.
- Created EMR using React to control and manipulate DOM and interactively render form inputs, as well as custom PDF creation.
- Added EMR note created to our Wordpress site for our clients to use and implemented a smooth transition between our existing services and the new SOAP note.
- Assisted in Wordpress admin set up, client registration, information update, as well as bug fixes.

Front-End Web Developer, 04/2017 to 02/2018

Analytic Owl – Orlando, FL

- Technologies used HTML, CSS, Sass, Vue, Twig, amCharts, D3, Materialize, Semantics, Intro.js, jQuery, airDatepicker, dataTables, Git.
- Redesigned graphs throughout the site, as well updated our tools being used from amCharts to D3
- Worked closely with QA to ensure smooth experience and smooth transition to new features
- Redesign the PDF report, giving it a more styling and update look across all data being imported.

Front-End Web Developer, 01/2017 to 02/2027

LifePath – Orlando, FL

- Technologies used, HTML, CSS, React, React-Router, Firebase, Material-UI.
- Developed a database structure as a JSON file and imported to firebase to contain user information.
- Created the beginning stages of website, from design on with an easy and smooth UI.
